GYNECARE TVT™ Obturator System Tension-Free Support for Incontinence

Description & Specs

GYNECARE TVT Obturator System

The procedure starts at a precise mid-urethral point and continues away from critical structures utilizing an Atraumatic Winged Guide for accurate introduction and passage of the device, allowing for minimal dissection.

Reported pain rates are low and there is no significant difference between the inside-out and outside-in approaches.¹⁴³

GYNECARE TVT™ is a retropubic mid-urethral sling used for the treatment of female stress urinary incontinence. GYNECARE TVT Obturator System is a transobturator mid-urethral sling used for the treatment of female stress urinary incontinence.

In May 2015, Ethicon revised its Instructions for Use and Patient Brochure for the Gynecare TVT Family of Products. To review the revised Instructions for Use, [click here](#)
